## Welcome

Welcome to the 2001-02 edition of the *Statistical Summary*, an annual publication of the Nova Scotia Department of Education.

The purpose of this document is to provide school board officials, Department of Education staff, teachers, and parents as well as the public with statistical information about the public school system in Nova Scotia. The information is provided to support informed policy making and to promote a better understanding of how the education system functions in the province.

The *Statistical Summary*, provides data for the recently completed school year, and comparable historical information. Please note that, due to changes in collection and reporting methods of some data, it is not always possible to provide historical information.

With approval of Bill 47 in June 2000, the Southwest Regional School Board was split into two district school boards namely the South Shore District School Board and the Tri-County District School Board. As legislated, the district school boards are responsible for educational issues and the hiring of teachers, program support assistants and school library staff. The Southwest Regional School Board and the central administrative staff are responsible for finance, buildings, transportation, corporate services, evaluation & monitoring, central communications and technology support for both district boards.

The *Statistical Summary* is largely the product of requests over the years for information on a wide range of topics. The basic intent is to provide a reference document. If you require additional statistical data on topics covered in the document, or further information, please contact the Department directly (telephone 902-424-6988). Your feedback and questions regarding this document are welcomed. Detailed contact information is provided at the end of this document.

## School Information

This section provides the number of schools by enrollment and by grade.

### Number of Schools

The number of schools in Nova Scotia continues to fluctuate with new schools being built and the older schools closing. Some of the reductions or increases in the number of schools are not as a result of school openings or closings but of board administrative decisions. For example, one principal may be given responsibilities over two or more schools that are then consolidated and reported as one school. These schools may be separated and reported individually in other years. There were a total of 460 schools for the 2001-02 school year.
